10.8	Multiple log linear regression results of FDI with various determinants for the emerging economies of Asia	195
11.1	Correlation between FDI and foreign student enrolment in the USA, 2001	204
11.2	Low-FDI Asian countries, Student numbers, 2001	205
11.3	China and India: selected FDI indicators, 1999–2001	212

List of Figures

4.1	Realized capital and actual FDI inflows, 1984–2000	66
4.2	Distribution of actual FDI, by region	69
5.1	Sales of personal computers in China, 1990–2000	113

Preface and Acknowledgements

It all started in the early 1990s. The first step to producing a book on foreign investment was made when I was offered a contract to edit a book on *Foreign Investment in Developing Countries* (Palgrave, 2004). I am most grateful to Mr T.M. Farmiloe for his encouragement and for sowing the seeds. The chapters were assembled from top professionals, academics and practitioners from all over the world specializing in the field of foreign investment. For reasons beyond my control, the book could not be published at that time, but persistence pays, and has its own rewards. In 2003, I was given a fresh contract by Ms Amanda Watkins, Senior Commissioning Editor. She deserves and receives my highest appreciation and regard for her encouragement and goodwill. Ms Kerry Coutts, Editorial Assistant, Economics, Business and Management, ably supported my endeavours throughout.

A fresh call for chapters was issued in the summer of 2003, and the response from contributors was overwhelming. Proposals for chapters were received from top scholars, professionals and academics from all over the world and were included in the book *Foreign Investment in Developing Countries* and in the present volume, to which authors from various backgrounds and with first-hand knowledge of the theory and practice of foreign investment in China and India have contributed.

I wish to thank all the contributors for their excellent contributions. A special vote of thanks is also due to Professor Earl A. Thompson for accepting our invitation and making a highly valuable contribution within very tight delivery schedules. All of the contributors also served as reviewers for other chapters, and assisted the Editor in producing a wonderful product. The chapters went through a double-blind review process. Irrespective of having their own congested schedules, the reviewers responded promptly and enthusiastically to all my requests. However, some individuals need a special mention, as their help set the benchmark. These include: Professor Vincent F. Yip, University of San Francisco; Professor Takeshi Otsu, Seijo University of Tokyo; Dr Mark Wade, University of Tennessee; Dr Andrew Sumner, University of East London; Dr S.K. Singh, XLRI, Jamshedpur; Emeritus Professor Akira Ishikawa, Aoyama Gakuin University; Dr Naoko Shinkai, Economist, Development Studies, Japan Bank for International Cooperation Institute, Tokyo; and Dr Richard Dawson, University of Waikato, among others.

A special vote of thanks is also owed to those who provided us access to their networks, introducing us to potential authors and contributors and encouraging us to persist with the project to its successful completion. They are too numerous to mention by name.

In addition to the contributors and reviewers, the production of a book needs immense technical and organizational help. Here a special mention must be made of Harender Haresh Samtani for his technical help in the editing process and also for his very valuable contribution through his computing and linguistic skills. His presence, perseverance and contribution to the development of this book have significantly raised its quality. The countless hours he spent have been rewarded by the excellence of the contributions received. His personal contribution in organizing the huge amount of information was instrumental in keeping order among the deluge of papers and information. He was also of great help in the review process by ensuring that the schedule was adhered to and following up various loose ends. His organizational skills deserve a special mention and should be highlighted. His constant presence and persistence encouraged and strengthened my resolve to see this project through.

I also wish to acknowledge the unselfish help and technical support provided by Varinder P. Singh and Dr Kiranjit Sohi during the final days of the project.

The journey on this path over eight years has been very arduous, I take this opportunity to express my sincere thanks and gratitude to my family, who have been supportive and patient throughout this venture, without which this project could not have been completed successfully. I am highly grateful to my wife Harbans Kehal, my children and other members of the family for great moral support that bolstered me throughout the long gestation period of this project. Without their forbearance, understanding and enthusiasm, I could not have brought it to fruition.

A collaborative project like this cannot exist in a vacuum, and cannot be kept running without enormous support and help of many kinds. It is appropriate to acknowledge all of those people who I know have directly or indirectly shaped this work by contributing to its successful production. Many friends in Sydney and other countries have provided the inspiration and support by reading and commenting on drafts. Mr J.S. Sawhney deserves special mention and also Professor Tejpal Singh and Dr G.S. Sidhu for providing valuable and constructive comments. Thanks also to the many others too numerous to mention by name who spared their valuable time.

This book is a culmination of hard labour over fifty years of learning, teaching, researching, sharing and imparting knowledge of economics and related subjects in developing countries and also in Australia, Japan and other developed countries. Particular mention must be made of the intellectual enrichment received from discussions with colleagues from Japan: Professor Minoru Harada, Kyushu University; Professor Saburo Saito, Fukuoka University; Professor Ken-Ichi Tanaka, President, Kitakyushu University; and many others who shared their ideas, insights and technical knowledge with me during my frequent sojourns in Japan.

Interactions with professionals, academics and researchers at professional meetings and gatherings including the Western Economic Association

International, Business and Economics Society International, International Food and Agribusiness Management Association, Indian Ocean Research Network, the Economic Society of Australia, the Australian Institute of International Affairs and many other professional organizations. My students spread all over the world always come handy for sharpening my arguments. Discussions with Dr P. Dass, University of Manitoba, on various aspects of FDI strategy have clarified many issues. A special environment at the University of Western Sydney also facilitated my work on this project. The cooperative attitude of all my colleagues has had a direct impact on the successful completion of this task.

Special thanks go to the publishing team at Palgrave Macmillan who via their timely emails prompted me to always meet my deadlines and keep the project on schedule. I hereby acknowledge their help for their unstinting support to this project.

H.S. KEHAL

Notes on the Contributors

Madhu Bala is an Associate Professor of Economics at Indira Gandhi National Open University (IGNOU), New Delhi, India. Dr Bala is a gold medallist in MA Economics and received her Doctorate from Jawaharlal Nehru University, New Delhi. Her areas of interest include development economics, India–Australian studies and research methods. She has authored many publications in national and international books and journals. Her most recent book is the *Cement Industry in India: Policy, Perspective and Performance* (2003). She is currently coordinator of two international collaborations (IGNOU and the World Bank and IGNOU and Manchester Metropolitan University).

Rashmi Banga is an Associate Professor in Department of Economics of Jesus and Mary College, Delhi University and is also associated with Indian Council for Research on International Economic Relations (ICRIER). She has submitted her doctorate thesis to Delhi University and holds Mphil and Masters degrees in Economics from the Delhi School of Economics. Her areas of interest include international economics, with emphasis on trade and FDI; WTO issues; productivity analysis; labour market issues; and corporate governance. She has presented papers in many International Conferences and she is a board member of the Academy of International Business (AIB Chapter on India). Her publications have appeared in journals such as *World Development*, *the Journal of International Economic Studies*, *Economic and Political Weekly*, etc. she has also contributed to an edited volume for Palgrave Macmillan.

Santosh Bhandari is a Senior Lecturer of Commerce at Bhupal Nobles' PG College, Udaipur, Rajasthan, India. She specializes in marketing and human behaviour and has 10 years' teaching experience in undergraduate and post-graduate classes. She has published four articles and is a life member of the All India Commerce Association, and the All India Accounting Association. She is currently working on a University Grants Commission-sponsored Project on 'Marketing of Hotel Services'.

K. Sham Bhat received his MA degree in Economics from Calicut University in 1981 and his PhD degree in Economics from Cochin University of Science and Technology in 1986. He has more than 20 years of teaching and research experience and has published more than 60 articles in national and international journals and two books. He is currently a Member of the Planning Commission, Government of Pondicherry, Heading the Department of Economics, Pondicherry University and also Chief Editor of the *Asian-African Journal of Economics and Econometrics*.

Sumon Kumar Bhaumik is a Lecturer of Economics at Queen's University Belfast. He is also a Fellow of the Centre for New and Emerging Markets at London Business School, and a Research Fellow of William Davidson Institute, Ann Arbor, Michigan. He is on the editorial boards of *Emerging Markets Finance and Trade* and *The Eurasian Review of Economics and Finance*. His areas of research are corporate governance, financial markets and firm-level strategies.

Leonard K. Cheng is Professor and Head of Economics in the School of Business and Management at the Hong Kong University of Science and Technology. He received his BSoSc from the Chinese University of Hong Kong, and his MA and PhD from the University of California at Berkeley. His research interests are in international trade and investment, currency crisis, applied game theory, industrial organization and high-tech industries. He has served as Associate Editor for the *Journal of International Economics* and the *Pacific Economic Review*, and as Guest Editor for the *Review of Industrial Organization*. He has published articles in leading international academic journals, book chapters and two books on Hong Kong's economy. In addition, he has co-edited a book on global production and trade in East Asia and another on the management and performance of China's domestic private firms.

Ramin Cooper Maysami is an Associate Professor at the School of Business at the University of North Carolina at Pembroke, USA. His previous teaching experience includes an Associate Professorship at Nanyang Business School and an Assistant Professorship at the University of Illinois at Springfield, USA. His research experience is multi-disciplinary and crosses geographic borders. His main area of research is regulation of financial institutions and markets, with secondary interests in entrepreneurship and economic education. He has published on issues related to and concerning Singapore, Malaysia, Thailand, South Korea, China (and Hong Kong), the Middle East, Mexico and the USA, in total, more than 50 articles in academic refereed journals and professional/trade publications.

Harbhajan S. Kehal is a Senior Lecturer in Economics at the University of Western Sydney, New South Wales, Australia; previously he completed his PhD at the University of Western Australia, Perth. His research interests centre around the digital economy, foreign investment in developing countries and the economic relationships of Australia with Japan and other countries. Chapters based on his research have appeared in books published in Australia and other countries. He is Associate Editor of the *World Review of Science, Technology and Sustainable Development*. He has co-edited a book on *Digital Economy: Inputs, Influences and Challenges*.

Wayne Lim is a Master of Business (by research) candidate on a full academic scholarship at Nanyang Technological University, Singapore. He

graduated with a Bachelor of Business from Nanyang Technological University in 2000. Prior to the commencement of his graduate studies, he was a credit analyst with Skandinaviska Enskilda Banken AB, Singapore Branch, and took charge of a portfolio of corporate clients in Asia. His research interests include monetary, developmental and international economics, with a special focus on East Asian economies. Currently, he is conducting a comprehensive analysis of the impact of deposit insurance on bank stability in developed countries and countries with well-liberalized financial systems.

Rekha Mehta is an Assistant Professor of Economics at J.N.V. University, Jodhpur, India. She did her postgraduate work at Rajasthan University and holds an MPhil and a PhD from the J.N.V. University. She has taught undergraduate and postgraduate subjects at Bangur College Pali from 1992 and since 1996 at J.N.V. University. She is a life member of the Rajasthan Economic Association and the Indian Economic Association. Her main research interests are macroeconomics and international economics and economic growth and development. She is also the author of *Saving Behaviour in India* and has participated in national and international conferences.

Takeshi Otsu studied economics at Keio University, Tokyo, Japan, where he received his BA in 1990 and his MA in 1992. In 1999, after gaining a PhD in International Economics and Finance from Brandeis University, USA, he became an Assistant Professor at Keio Economic Observatory, Keio University, Tokyo, where he participated in projects studying economic growth and environmental problems in Asian regions and China. He was also an assistant researcher at a private policy institute, the 21st Century Policy Institute, Tokyo. In 2000, he took up a lectureship at Hitotsubashi University, Tokyo teaching undergraduate courses in econometrics and graduate courses in applied econometrics. In 2003, he became Associate Professor at Seijo University, Tokyo, teaching undergraduate courses in macroeconomics.

K. Durai Raj completed his MS degree in Applied Economics and is currently pursuing his MPhil degree at Pondicherry University, working in research in the area of international economics.

Jurgis Samulevicius works as a Lecturer of Micro- and Macro-economics at the Department of Social Economics and Management in Vilnius Gediminas Technical University of Lithuania. He graduated from the Vilnius University and postgraduated in the Kiev Institute of Trade. After graduating in Master Studies in Vilnius University, he worked in the Institute of Economics of the Lithuanian Academy of Sciences as a senior researcher. The results of his multiple researches have been presented in more than 80 publications. His most recent publications in English are: *Introduction to Macroeconomics* (Vilnius 2001) and *Introduction to Modern Economics: Macroeconomics* (Vilnius,

2003). His research interests include foreign investment in developing countries, environmental economics and management, the economics of European integration and the digital economy.

Harender H. Samtani has three masters' degrees in the fields of management, finance and accounting. His interests lie in the fields of international finance and trade. He has had a rich and varied professional experience derived from various roles in a multinational bank before moving to the academic fraternity, where he has held a research position. Well versed in the business scenario in India, he is currently focusing his research towards recent economic developments. He has been actively involved in the editing of this book and played a key role in its development.

Jagjit S. Sawhney retired from the Indian Economic Service after a highly successful career. He was an Additional Economic Adviser to the Ministry of Commerce, Government of India and also held many other responsible positions in the Indian public service. He maintains a deep interest in economic research and has published a number of articles and research papers. He actively joined with the editor of this book in reviewing the contributions.

C.U. Tripura Sundari completed her BSc in Computer Science at the Women's Christian College affiliated to Madras University. She received her MSc Degree in Economics in 2000 at the Madras School of Economics, affiliated to Anna University Chennai. She is now a full-time PhD scholar at Pondicherry University, engaged in research work in the area of international economics and regional economics. She is actively involved in the preparation of the 'Pondicherry Vision 2020' document and has published several articles in national and international journals.

Earl A. Thompson received his Bachelors degree at UCLA in 1959 and his economics MA and PhD from Harvard in 1961. His next three years were spent as Assistant Professor of Economics at Stanford University, where his formative ideas were developed. Perhaps the one for which he is best known is his 1966 paper establishing the first demand-revealing mechanism for collective goods. A second was a 1968 paper describing various inefficiencies resulting from the perfectly competitive production of collective goods. A third, from which Chapter 1 of this volume springs, was a pair of JPE papers (1974 and 1979) establishing an efficiency rationale for a country's evolved tax system. These papers, and many others, can be downloaded from <http://www.econ.ucla.edu/thompson/>. He has been a UCLA Professor since 1965.

Tong Xiaoshuang is a final-year student for his bachelor degree at the Vilnius Gediminas Technical University of Lithuania. His study programme is business management, and his specialization is marketing management. He has been involved in studying international business strategies in the

developing countries. His bachelor thesis will focus on the development of China's economy from the overview of FDI, China's accession to WTO, the IT and digital revolution and the vision of China's economy in long-run perspective.

Vincent F. Yip is an international lecturer and consultant with wide global experience. He received his PhD in Materials Science (USC, 1973) and his MBA (USD, 1976). He was Chief Scientist and Administrator of the Singapore Science Park during 1980–9, and served as Singapore's Deputy Ambassador to the EC in 1989–91. He has consulted in China, the USA, Europe, Mexico and Egypt for clients such as the World Bank, the Asian Development Bank and UNDP. He was awarded the French Government decoration *Palme Academique* in 1989 for his international contribution to France's scientific/technology fields. His teaching and research fields include technology policy, cross-cultural management, international talent flow, product management and project management. His latest research project on the Socio-Cultural Aspects of e-Business in China is being done in cooperation with Professor Alev Efendioglu of USF's SOBAM.
